The Gigantix Wallet WhitePaper

Executive Summary

Cryptocurrencies have witnessed an unprecedented surge in adoption, underscoring the critical need for secure storage solutions. Gigantix Wallet addresses this demand by introducing an innovative cold wallet solution that leverages everyday NFC-enabled cards. This whitepaper not only highlights the distinctive features and security measures of Gigantix Wallet but also provides a strategic roadmap for long-term success.

2. Innovative Cold Wallet Solution

Utilizing Everyday Cards

Gigantix Wallet's innovative approach leverages everyday cards, such as ATM, credit, or debit cards, to create a secure and user-friendly cold wallet. This not only aligns with the widespread adoption of NFC technology but also taps into the established trust users have in their everyday cards.

Security Measures

Gigantix Wallet addresses security concerns by implementing a robust combination of encrypted ISODEP and encrypted PIN. This multi-layered approach, combined with the inherent security features of everyday cards, ensures the utmost protection for users' private keys.

3. Authentication Process

Robust Authentication

Gigantix Wallet's security is top-notch. When users tap their cards, the app is fortified with multiple encryption layers. Users can also add an extra layer of security called salt encryption. In cryptography, a salt is random data that's added to a one-way function, like a password or passphrase. This helps protect against attacks that use precomputed tables (like rainbow tables), making it much harder to break through. It's like adding a super-strong lock to an already secure vault. Even if someone tries to break in, it would take years.

4. Advantages Over Traditional Wallets

Convenience

The seamless and convenient access to the cold wallet using everyday cards distinguishes Gigantix Wallet from traditional storage methods. This eliminates the complexity often associated with transferring assets to cold storage solutions.

Security Enhancement

Compared to traditional online and mobile wallets, Gigantix Wallet provides an additional layer of security. This ensures that users' digital assets remain safeguarded in an environment fortified against cyber threats.

Why This is a Revenue Game-Changer?

Security Redefined

Your NFC accessories serve as an extension of Gigantix Cold Wallet, ensuring airtight security for your cryptocurrencies. With the power of NFC technology, you can manage your assets with just a tap, adding a layer of convenience to your crypto experience.

Stylish Utility

Beyond security, these accessories redefine style in the crypto space. Now, your jewelry isn't just an accessory; it's a functional cold wallet that complements your lifestyle. It's a convergence of fashion and functionality, introducing a new era of crypto-wear.

Revenue Sharing

What makes this innovation even more exciting is our commitment to our community. For every transaction made through these NFC wearables, we pledge to give back 50% of the earned revenue directly to our holders. It's not just about fashionable utility; it's about collectively sharing in the success of the ecosystem.

Incentivizing Participation

By integrating revenue sharing with wearables, we incentivize active participation in our ecosystem. Holders become stakeholders in both style and success, fostering a dynamic relationship where every accessory purchase contributes to the shared prosperity of the community.

In essence, Gigantix is not only revolutionizing the way you secure and access your digital assets but also introducing a revenue-sharing model that integrates seamlessly with your stylish NFC accessories. It's not just about technology; it's about making a bold statement – your style, your security, and your share in the success of the Gigantix ecosystem. Welcome to the future of wearable crypto sophistication.

6. Tokenization and Tokenomics

GTX Token: A Gateway to Ownership Shares and Benefits

The GTX token is the cornerstone of Gigantix, symbolizing ownership shares and unlocking proportional benefits for its holders. This digital asset serves as a unique form of equity in Gigantix, providing investors with a pathway to participate actively in our ecosystem's growth and success. By staking GTX tokens through our official Staking Platform, holders not only secure their ownership but also gain access to lucrative revenue streams. The GTX-WETH pair becomes a vital conduit, distributing proportional benefits in the form of liquidity tokens to those engaged in the staking process.

Tokenomics

Gigantix Wallet Token (GTX)	Total Supply (%)	Total Supply (GTX Tokens)
Liquidity Provider	80%	80,000,000
Airdrop Event	5%	5,000,000
Team Vesting	5%	5,000,000
Marketing & Partnership	5%	5,000,000
Future Liquidity	5%	5,000,000
Total Allocated	100%	100,000,000

Tax: 4% buy and sell tax

Totally 100,000,000 Tokens

- 95% circulating tokens.
- 5% of the tokens locked for a year (until November 2024).

Token as Shares: Engaging with Revenue Streams and Transparency

Underpinning Gigantix's commitment to transparency and investor engagement is the revenue distribution mechanism tied to the GTX-WETH pair. GTX tokens, beyond their role as ownership shares, function as a direct link to revenue streams through our Staking Platform. This innovative approach ensures that holders receive tangible representations of their rewards in the form of GTX-WETH LP tokens. As holders stake their tokens, they gain a stake in liquidity pools involving GTX and Wrapped Ethereum (WETH), fostering a transparent and dynamic relationship between their investment and the success of Gigantix.

7. Market Impact and Revenue Projection

In the ever-expanding landscape of cryptocurrency, Gigantix stands out as not just a secure and user-friendly cold wallet but as a revolutionary force poised for substantial market impact. Here's why:

Unlocking Value as a Free Cold Wallet

Gigantix isn't just a cold wallet; it's a seamless, free solution for safeguarding your digital assets. The value lies in the simplicity and security it offers, accessible to everyone without the need for additional devices.

Potential Across Chains

Let the numbers speak: Ethereum boasts 250 million cumulative unique addresses with a daily active wallet count exceeding 500k. Binance Smart Chain (BSC) follows suit with 400 million+ cumulative unique addresses and over 1 million daily active wallets. Gigantix taps into this vast user base, showcasing its potential impact across multiple chains.

- Ethereum Stats: [Cumulative Addresses](#), [Daily Active Wallets](#)
- BSC Stats: [Cumulative Addresses](#), [Daily Active Wallets](#)

Marketing Strategy

Showcasing \$GTX's potential involves highlighting its ease of use in storing assets without the need for additional hardware. Our strategy hinges on reaching a mere 0.1% of the massive user base on these chains. The simplicity of opening a wallet with just a credit or debit card and a 6-digit pin code makes Gigantix accessible even to the elderly.

Airdrop for App Downloads

In a strategic move to boost app downloads, a smart contract will initiate a 500k \$GTX airdrop, constituting 0.5% of the total supply. At the current value, this airdrop is equivalent to \$26k. The aim is not just to increase user statistics but to drive social media sharing, amplifying our presence across various platforms.

Comprehensive Stats

Transparency is key. Our strategy involves presenting comprehensive statistics, including holder counts, Telegram members, Twitter followers, partnerships, and collaborations with influencers and projects. This holistic view of our ecosystem provides potential investors with a clear understanding of our community strength.

In summary, Gigantix's market impact and revenue projection are grounded in its innovative approach as a free and user-friendly cold wallet, tapping into the vast user base of major chains. With a strategic marketing plan and comprehensive statistics, Gigantix is poised to make a significant mark in the cryptocurrency space.

13. Privacy Policy

User privacy is of utmost importance to us. Gigantix does not retain any user information. This privacy policy is designed to clarify how we handle user data without collecting and/or storing it anywhere.

Gigantix offers a Cryptocurrency Cold Wallet utilized by our mobile application. The only user data we process is the ISODEP Identifier from the user's NFC card, which we then use as one of the raw data inputs to create a Cold Wallet. Once again, we only process this data and never store it anywhere.

Gigantix will not make any changes to this privacy policy. This policy is effective starting from November 8, 2023.
